Sr Lau Chi Kwong LSD Council Chairman

## Technical Visit to Guangzhou, 27-29 November 2023

**The technical visit to Guangzhou had three tasks:**

- 1) Invitation of FIG Vice President to attend CHINTERGEO 2023
- 2) Fulfillment of HKIS's PASS project by attending CHINTERGEO 2023
- 3) Academic & Professional Exchanges at 廣東省國土資源測繪院

### 1. Invitation of FIG Vice President

Our Land Surveyor, FIG Vice President, and HKIS Past President Sr Prof Winnie Shiu, along with Immediate Past Chairman Sr Paul Tsui were invited to the opening ceremony of Exhibition CHINTERGEO 2023 (測繪地理資訊技術裝備展覽會) in Guangzhou on 27 November.

At the exhibition, the FIG had a booth providing information on international surveyors.

### 2. Professional Advancement Support Scheme (PASS): Promote Land Surveying Technological Services to Belt-and-Road Countries

Also during CHINTERGEO 2023, Sr Dr Conrad Tang, Sr Prof Charles Wong (PolyU), Sr Desmond, and two PolyU research assistant professors attended it on behalf of the LSD, to promote land surveying technological services to Belt-and-Road countries, as well as PolyU's degreed programmes.

Winnie was also invited to give an opening speech at the opening ceremony of the CHINTERGEO 2023 conference (測繪地理資訊技術裝備應用領域發展交流會) in Guangzhou on 28 November.

Sr Prof Charles Wong was also invited to speak at a CHINTERGEO 2023 forum (三維鐳射校術發展及應用領域論壇) on 28 November.

### 3. Academic & Professional Exchanges

On 27 November, the LSD visited the 廣東省國土資源測繪院. Sr Paul Tsui introduced the HKIS and land surveying profession in Hong Kong to the hosts, who appreciated what land surveyors could do there. They also shared their academic and professional experiences in managing spatial data. The LSD was invited to return to exchange its academic and professional technologies and management techniques in the near future.

## CPD Highlight

### Joint Technical Visit: Boardwalk Project underneath the Island Eastern Corridor

The Joint Technical Visit: Boardwalk Project underneath the Island Eastern Corridor was successfully organised by the LSD and CICES on 16 December. The purpose of the visit was to explore the construction of composite boardwalk decks and marine foundation works, including large-diameter bored piles and pre-bored socket H-piles, along the Hong Kong Island East waterfront.

Sr Michale Wong (left) presents a souvenir to Mr Neil Wong (right).

The event's success was made possible by the generous support of the Civil Engineering and Development Department; Meinhardt Infrastructure and Environmental, Ltd; and IEC Boardwalk JV. I express my appreciation for and gratitude to Mr Neil Wong, Chief Resident Engineer at Meinhardt, and Mr Philip Daynes, Engineering & Risk Manager, IEC Boardwalk JV, for delivering informative talks on the project, its safety and environmental protection schemes, and innovative construction techniques.

Sharing Session by Mr Philip Daynes

Overall, the joint technical visit provided an invaluable platform for members to witness first-hand the construction techniques and infrastructure developments that will contribute to the transformation and enhancement of the Hong Kong Island East harbourfront. This CPD was a remarkable opportunity for participants to expand their knowledge and understanding of these significant projects. Finally, I express my appreciation to LSD Council Member Sr Calvin Li for organising this event.
